

INTERNATIONAL PROJECTS AND SCIENTIFIC PROGRAMMES COMPLETED BY SEPI

- EU-project EV5V-CT94-0439 «Short term earthquake prediction measurements in Greece at sites sensitive to observation of Seismic Electric Signals, SESs». Beginning on 1/6/1994, initial duration 24 months. Finally the measurements lasted 36 months. Initial Budget 153.4 KECU (94.462 ECU of which for the Physics Department of NKUA) while the final budget amounted to 260KECU. Coordinator Physics Department NKUA, P. Varotsos. Other members of the project: Department of Geology of NKUA, CEA, Uppsala University, Kanazawa University (Japan).
- EU-project EPETII-388 «Installation of a telemetric network for Earthquake Prediction multidisciplinary measurements in the Epirus area». Duration 1/1/1995 – 31/12/1997. Total budget 1487 KECU. Coordinator Solid Earth Physics Institute, 695KECU, P. Varotsos. Other members of the project: Department of Geology of NKUA, Department of Geology of the University of Patras, M&S HOURDAKIS AEBE.
- LEONARDO DA VINCI Programme EL/97/2/00981/PI/II.1.1.C/FPC «Vocational Training plan for geoscientists and workers at prefectures in Geophysical methods for subsurface, environmental and earthquake prediction». Duration 8/12/1997 – 7/12/2000. Total budget 150 KECU. Coordinator Solid Earth Physics Institute, 105KECU, P. Varotsos. Other members of the project: DEMKA, DANSK, Uppsala University.
